

# DREAM CRYPTO

Litepaper V1.0

**DREAM – Cryptocurrency for every passionate crypto enthusiast and investor**

### **What is the mission of DREAM?**

DREAM's mission is to make finance more accessible and rewarding for everyone. With its user-friendly platform and innovative tokenomics, DREAM empowers individuals to take control of their financial future and connect with like-minded people around the world. Join the DREAM community today and experience the power of decentralized finance.

DREAM Crypto is creating DREAM as a universal cryptocurrency that follows the principles of blockchain technology, including decentralization, transparency, and peer-to-peer value exchange. DREAM's unique tokenomics is designed for mass adoption with the lowest barrier to entry among other coins in the market. By prioritizing accessibility and security, DREAM aims to fulfill the original mission of blockchain and empower people worldwide.

### **What problem does DREAM solve?**

DREAM is designed to address the issues of market manipulation, excessive selling pressure, inflation, and limited accessibility in the cryptocurrency industry. Its innovative tokenomics that incentivize holding and limit token supply, combined with a user-friendly platform, offer investors a decentralized and secure ecosystem for transparent value exchange.

### **What makes DREAM unique?**

DREAM's unique tokenomics incentivizes and rewards holders with high APY, while its partnerships with other projects provide added value for users. DREAM's commitment to accessibility, transparency, and decentralization makes it a better financial platform for all, enabling users to participate in a fair and secure ecosystem for value exchange.

DREAM cryptocurrency allows for participation without any upfront costs, making it accessible to all.

DREAM has a fixed total supply, ensuring that it is not subject to inflationary pressures.

DREAM is a decentralized digital asset that derives its value from the strength and adoption of its ecosystem.

DREAM is an immutable cryptocurrency secured by a trustless consensus mechanism, giving power to the people.

DREAM is not governed by any central authority, instead relying on the power of its open-source code and community.

DREAM is a Proof of Participation (PoP) cryptocurrency, meaning that ownership is granted through active engagement.

DREAM smart contract uses a fair system for token distribution, providing equal opportunities for all participants.

DREAM incentivizes participation by rewarding token holders with a system of time-locked rewards.

**What is the formula to generate rewards for the participants?**

DREAM tokenomics do not involve locking or staking of any assets, as only a wallet is needed for participation. It's as simple as holding your tokens in your wallet.

**Why will DREAM appreciate in value?**

DREAM has a unique tokenomics model that rewards its holders and offers utility as the native token for upcoming projects in the DREAM ecosystem. Token burns will be implemented to support the development of these projects, creating further demand for DREAM.

## DREAM's TOKENOMICS

Total Supply 500,000,000,000,000 TRILLION

Taxes 0% NO TAXES

## REWARD SYSTEM

### TERM LIMITS

The term of the Proof of Participation (PoP) protocol is set to a period of two weeks. To be eligible for rewards, users must hold their DREAM tokens until the end of the two-week term. During this term, users can purchase DREAM tokens at any time. However, selling tokens before the end of the term will result in the forfeiture of any potential rewards.

### TERM LIMITS CALENDAR YEAR

FIRST TERM MAY 20, 2023	Term/Rewards Week
	Week 2
	Week 4
	Week 6
	Week 8

	Week 10

	Week 52

## REWARDS

You will receive a generous 52% APY, or 2% every TERM LIMIT (two weeks). Rewards will be calculated on your holdings at the end of the term limit, as seen on Polygonscan.

Example : You hold 1,250,000,000,000 Trillion DREAM tokens \* 2% = 25,000,000,000 Billion for that Term (2 weeks).

## Can interested parties buy or sell DREAM crypto?

DREAM tokens can be easily acquired through popular decentralized exchanges (DEXes) like Uniswap or Sushiswap. Likewise, DREAM holders can conveniently trade or sell their tokens on these same platforms.

### **What can I do with DREAM crypto?**

DREAM cryptocurrency offers a range of possibilities. Just like an ERC20 token, DREAM can be traded for other cryptocurrencies or NFTs. Users can take advantage of the Uniswap ecosystem by creating limit orders or liquidity pools to trade DREAM automatically. You can use it to participate in various projects that are part of the DREAM ecosystem, as well as simply holding the token to earn rewards.

### **Does DREAM crypto run on its own blockchain?**

No, DREAM is built on top of the Polygon network, which is a layer 2 scaling solution for Ethereum. This allows DREAM to take advantage of the security and stability of the Ethereum network while also benefiting from the faster transaction speeds and lower fees of the Polygon network.
